

American Hospital Association

“I don't know of another software that does what C-TRAC does. It just works. No bugs or glitches. I'm not going anywhere as a customer.”

Ongoing support is great. C-TRAC is a user friendly and robust way to file returns electronically. It's laid out like a CPA designed it (that's a good thing!).”

Research

Referrals and recommendations led to C-TRAC

Outcome

Time-savings:

- K1x makes it easy to electronically file returns with the IRS. Using C-TRAC to collaborate with outside CPA firm eliminates back and forth with PDFs and version confusion. Everyone has access to real time returns.

Accuracy/reliability:

- “We use C-TRAC and our CPA firm uses it. We also like the customizable controls that prevent a CPA firm from making unauthorized changes that we don't know about.”
- “I appreciate it that it maintains its integrity without changing my data (a problem I have experienced with other software). C-TRAC always maintained data integrity.”

Quality of life

- “I don't know anyone in their right mind who would try to do this 990 work without C-TRAC. They would be in a world of hurt.”
